The ENSEIRB-MATMECA Network and Information Systems (RSI) programme allows students to master communications, digital and computer technologies in order to become information systems architects.

**Courses**

1st, 2nd and 3rd years

- Engineering sciences
- Networks
- Computer science
- Signal processing and digital communications
- Web development
- Information systems
- Industrial electronic systems
- New network and telecommunications infrastructures
- Industrial networks
- Network and information system management
- Corporate culture
- English language

**Student testimony**

The Information Networks and Systems programme provided me with theoretical training and allowed me to apply what I learned in the professional world. The three-year work-study programme gave me experience and maturity and led to my being offered a position at the company where I did my apprenticeship, even before I had graduated.

Yahya

**Employment prospects:**

1st job

- €38,410 average gross annual
